

Appl. No. 10/738,430
Examiner: BALAOING, ARIEL A, Art Unit 2683
In response to the Office Action dated March 6, 2006

Date: June 6, 2006
Attorney Docket No. 10113501

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims

Claim 1 (currently amended): A mobile phone with a SIM card holder comprising:

a body including a first concave portion and a second concave portion;

a sliding holder disposed in the first concave portion of the body, the holder slidable ~~moveable~~ between a first position overlapping the second concave portion and a second position not overlapping the second concave portion; and

a SIM card removably disposable in the second concave portion of the body, wherein the SIM card is abutted by the holder so that the holder is slid ~~moved~~ to the second position from the first position during the disposition of the SIM card in the second concave portion, and the holder returns from the second position to the first position so as to fix the SIM card in the second concave portion when the SIM card is located in the second concave portion.

Claim 2 (original): The mobile phone as claimed in claim 1, wherein the body includes a first contact in the second concave portion, and the SIM card includes a second contact corresponding to the first contact, whereby the SIM card is electrically connected to the body by the second contact contacting the first contact.

Claim 3 (original): The mobile phone as claimed in claim 2, wherein the first contact is an elastic member, and the SIM card is ejected from the second concave portion by the first contact when the holder is moved to the second position from the first position.

Claim 4 (original): The mobile phone as claimed in claim 1, wherein the depth of the first concave portion is shallower than that of the second concave portion.

Claim 5 (original): The mobile phone as claimed in claim 1, wherein the first concave portion is formed with a hole and the holder includes a protrusion corresponding to the hole, whereby the holder is fixed in the first concave portion by inserting the protrusion into the hole.

Appl. No. 10/738,430
Examiner: BALAOING, ARIEL A, Art Unit 2683
In response to the Office Action dated March 6, 2006

Date: June 6, 2006
Attorney Docket No. 10113501

Claim 6 (previously presented): The mobile phone as claimed in claim 1, wherein the body includes an abutting surface between the first concave portion and the second concave portion, and the holder includes an elastic portion corresponding to the abutting surface, whereby the holder is disposed in the first concave portion of the body in a moveable manner by the elastic portion abutting the abutting surface.

Claim 7 (original): The mobile phone as claimed in claim 6, wherein the holder includes an inclined surface opposite to a surface formed with the elastic portion.

Claim 8 (previously presented): The mobile phone as claimed in claim 1, wherein the holder includes an inclined surface, and the inclined surface is abutted by the SIM card during the disposition of the SIM card in the second concave portion.

Claim 9 (original): The mobile phone as claimed in claim 1, wherein the holder includes a release hole to assist in the movement of the holder.

Claim 10 (currently amended): A mobile phone with a SIM card holder comprising:

a body;

a sliding holder disposed on the body, the holder slidable movable between a first position and a second position; and

a SIM card removably disposable on the body, wherein the SIM card is abutted by the holder so that the holder is slid moved to the second position from the first position so as not to overlap the SIM card during disposition of the SIM card on the body, and the holder returns from the second position to the first position to overlap the SIM card so as to fix the SIM card on the body when the SIM card is located on the body.

Claim 11 (previously presented): The mobile phone as claimed in claim 10, wherein the body includes a first concave portion, and the holder is disposed therein.

Appl. No. 10/738,430
Examiner: BALAOING, ARIEL A, Art Unit 2683
In response to the Office Action dated March 6, 2006

Date: June 6, 2006
Attorney Docket No. 10113501

Claim 12 (original): The mobile phone as claimed in claim 11, wherein the first concave portion is formed with a hole and the holder includes a protrusion corresponding to the hole, whereby the holder is fixed in the first concave portion by inserting the protrusion into the hole.

Claim 13 (previously presented): The mobile phone as claimed in claim 11, wherein the body includes a second concave portion for receiving the SIM card therein, and the depth of the first concave portion is shallower than that of the second concave portion.

Claim 14 (original): The mobile phone as claimed in claim 13, wherein the body includes a first contact in the second concave portion, and the SIM card includes a second contact corresponding to the first contact, whereby the SIM card is electrically connected to the body by the second contact contacting the first contact.

Claim 15 (original): The mobile phone as claimed in claim 14, wherein the first contact is an elastic member, and the SIM card is ejected from the second concave portion by the first contact when the holder is moved to the second position from the first position.

Claim 16 (previously presented): The mobile phone as claimed in claim 13, wherein the body includes an abutting surface between the first concave portion and the second concave portion, and the holder includes an elastic portion corresponding to the abutting surface, whereby the holder is disposed in the first concave portion of the body in a moveable manner by the elastic portion abutting the abutting surface.

Claim 17 (original): The mobile phone as claimed in claim 16, wherein the holder includes an inclined surface opposite to a surface formed with the elastic portion.

Claim 18 (original): The mobile phone as claimed in claim 10, wherein the holder includes an inclined surface and the inclined surface is abutted by the SIM card when the SIM card is externally disposed on the body.

Appl. No. 10/738,430
Examiner: BALAOING, ARIEL A, Art Unit 2683
In response to the Office Action dated March 6, 2006

Date: June 6, 2006
Attorney Docket No. 10113501

Claim 19 (original): The mobile phone as claimed in claim 10, wherein the holder includes a release hole to assist in the movement of the holder.

Claim 20 (previously presented): The mobile phone as claimed in claim 1, wherein the body includes an abutting surface between the first concave portion and the second concave portion, and the holder includes an elastic portion corresponding to the abutting surface, wherein the elastic member is compressed against the abutting surface by movement of the holder from the first position to the second position, and elastic force from the compressed elastic member returns the holder from the second position to the first position when the holder is released while in the second position.

Claim 21 (previously presented): The mobile phone as claimed in claim 13, wherein the body includes an abutting surface between the first concave portion and the second concave portion, and the holder includes an elastic portion corresponding to the abutting surface, wherein the elastic member is compressed against the abutting surface by movement of the holder from the first position to the second position, and elastic force from the compressed elastic member returns the holder from the second position to the first position when the holder is released while in the second position.
